HIGHLIGHTS 2024**VIOLA X WITTROCKIANA 'VOLANTE® COMPACT'**

Medium sized flowers, flat spherical growth, and a long flowering period - these are the proven characteristics of the 'Volante®' Series. This is complemented by a sister series with '**Volante® Compact**'. The new series has a compact, flat spherical habit and therefore ideal for smaller hanging baskets and 10.5-12 cm pots. A rich colour palette is available for the introduction: seven attractive varieties with a long flowering period for a colour spectacle from autumn to spring.

Discover the entire world of Volmary violas starting on page 5.

**PRIMULA VULGARIS 'JUPITER® SELECT MIX'**

The two-coloured star primrose special types of the 'Jupiter®' series are unique. Its bright large flowers enchant with a beautiful, different coloured centre. The already known single colours of this series are now joined by the new '**Jupiter® Select Mix**'. In this mix, the varieties are optimally matched in terms of earliness and vigour. 'Jupiter® Select Mix' is ideal for attractive spring decorations.

Our primula range starts on page 34.

POWER FOR YOUR PLANTS WITH MULTIKRAFT®

Effective by nature

The family-owned company Multikraft is a leading manufacturer and developer of microbial-based products that can be used in both conventional and organic horticulture. Multikraft plant fortifiers have extremely positive effects on plant health and growth. The products promote root formation and increase the plants' resistance to soil-borne plants and pests. In addition, the germination, flowering, fruiting and ripening of the plants as well as the luminosity of flowers are increased. In addition, Multikraft products support fertiliser uptake and juvenile development. With an optimal start, the plants become more resistant. Often a reduction or even a renunciation of pesticides becomes possible.

The products **MK Start** and **MK Blume**, specially developed for horticulture, are particularly easy to handle and prevent fungal diseases as well as pests. Stable growth and good branching is promoted by regular application of foliar sprays. Multikraft products have been used successfully for years in ornamental plant and vegetable cultivation and offer an excellent opportunity to produce in a more environmentally friendly way. Practical success as well as scientific studies and trials prove the effectiveness of the products.

Your Volmary contact person will be happy to provide you with information about Multikraft.
