VOLMARY NURSERIES AND INFORMATION CENTRE

Dear Customer,

We are delighted to provide you with the Volmary Young Plants & Seeds Catalogue for Autumn 2023 along with an optimal overview of the Volmary **Young Plants & Seeds** range to suit the season, making your production planning easier.

The Viola Cornuta 'Twix®' series has repeatedly proven itself for cultivation in autumn and spring. The attractive **'Twix® Beach Mix'** is new in the range, and will impress you with its uniform growth and early blooming.

Also discover the new **'Twix® for Mix'** colour combinations **'Purple Berries'** and the new **'Halloween Mix'** for seasonal sales in October. A special sowing method and tested combinations of varieties ensure uniform distribution of the flowers' colours and an attractive colour mix.

The interspecific Spring Checkies® trios of springtime bloomers are ideal for sale in March. These are now supplemented by other combinations, such as the **'Spring Checkies® Late Nassau'** with a particularly high-contrast combination of colours, consisting of orange ranunculus, blue polyanthus primrose and two-tone bellis.

With our cyclamen, you can add some strong-selling highlights to your range of potted plants. Special innovations include the pleasantly fragrant **'Metis® Absolu® de Morel'** in the Victoria type, the **'Metis® Abanico® Deep Magenta'** with wing-shaped, white-rimmed flowers, and the mini cyclamen **'Super-Serie® Dijk'** with corymbose, two-tone flowers.

The **Volmary® garden retail brand**, in colourful pots, is still increasing in popularity. Targeted marketing activities, both online and offline, are aimed at the creation of emotional Volmary® brand experiences. Many gardeners and marketers have recognised the good results that are achieved through this collaborative partnership. Have you already started producing in Volmary pots?

Better products and targeted information are a decisive factor for your success. Our international connections to scientists, plant breeders, producers of seedlings, production nurseries, marketers and the media, provide you with the world's best varieties and first-hand knowledge.

PRIMULA 'VICTORIANA'

Lush primroses with perennial growth are hugely popular. Our Primula veris series 'Victoriana', especially, with the particularly delicate lines of its flowers, offers terrific possibilities for attractively designed pots and table decorations. When it comes to the 'Victoriana' series, it is not only the velvety, vibrant flowers with their bright edges that impress, but also the colour and sturdiness of the foliage, thanks to the cultivation. The 'Victoriana Mix' by Volmary is also an attractive novelty for the end user.

Our primula range starts on page 34.

CYCLAMEN 'METIS® ABSOLU® DE MOREL'

Fragrance and optics are a magnet for end users. In this respect, our new fragrant cyclamen, 'Metis® Absolu® de Morel', captivates across the board. The beautifully wavy Victoria flowers stand above dark-green, marbled foliage and exude a very pleasant fragrance. This intensifies in the middle of the day and is almost a guarantee of impulse and spontaneous purchases.

The entire range of cyclamen can be found starting on page 67.

POWER FOR YOUR PLANTS WITH MULTIKRAFT®

Effective by nature

The family-owned company Multikraft® is the leading developer and manufacturer of effective microorganisms. With the help of this technology, Multikraft® produces environment friendly products with sustainable benefits for humans, animals and the environment. The functioning of Multikraft® is inspired by nature. It promotes regeneration and boosts natural processes. Microscopic living organisms, referred to as microorganisms, which are the basis of all life, are used to drive these processes. The use of Multikraft® plant boosters promotes root formation and increases the resistance of the plant to soil-borne diseases and pests. This product also increases the germination, flowering, fruiting and maturation of the plants and increases the radiance of the flowers, often making it possible to reduce or even eliminate the use of pesticides.

The new all-in-one products, **MK Blumen** and **MK Gemüse**, are particularly easy to use, and they prevent problems with fungal diseases and pests. Steady growth and bushiness are encouraged by regular spraying of the foliage. For years, Multikraft® products have been used to great effect in the cultivation of ornamental plants and vegetables, and they offer an excellent opportunity for environment friendly production. Gardening with the power of nature is also possible for you.

Your contact at Volmary® will gladly provide you with information about Multikraft®.
